THE SPEECH OF THE CHAIRMAN OF THE
UNIVERSITY BOARD OF FOUNDERS

On June 1, 1995 a group of teachers, lawyers and scientists, in accordance with the law on an entrepreneurs' activity of RA, established a higher educational institution named after great Armenian lawyer of the Middle Ages, the author of Armenian Code of Laws, Mkhitar Gosh. The passed 10 years were full of different interesting events and works.

The Mkhitar Gosh University was registered in the State Register of RA and got the State Licence by decision of the Ministry of Education and Science of RA for implementation of higher, special secondary and general public education.

Within a short time period all reasonable conditions for training and premises were provided, and before the sixth anniversary the University received the State Accreditation of RA.

How is the State accreditation interpreted?

First of all it is the State's recognition of the quality and the contents of the educational process in

our University.

The graduates of our University, who pass successfully graduation examinations, are awarded diplomas of the State standard.

Our graduates can be hired by all governmental bodies, including law enforcement bodies and other state departments.

Students of RA State Universities as well as of the CIS countries can easily be accepted by our University.

Graduates from Non-State Universities of RA not having accreditation, can enter our University and graduate from it within one academic year and get the diploma of the State standard.

Students of the Non-State and non-accredited universities of RA after corresponding certification can continue their study in our University having preserved the payment of the previous university.

Provisions are made at our University for some free of charge students' positions according to the State order. Every year graduates of multiple sec-

ondary schools of the region go to the capital only for the purpose of entering state universities, and because of current social hardships, have lots of problems there.

As per the Education law both State and Accredited Non-state universities have equal legal status. The Parliament will discuss the issue of introducing the relevant amendments to the law regarding military service in RA.

The University conducts post graduate education (magistracy, post-graduate research), resulting in preparation of pedagogical staff for the own needs of the University.

Nowadays several Non-State Universities seriously compete with the State higher educational establishments in

«MKHITAR GOSH» UNIVERSITY IS 10 YEARS

Mkhitar Gosh was born in 1120 in Gandzak. He got his education at his motherland and became a priest. Not being satisfied with his knowledge he went to Kilikia to improve his education at the prominent teachers of Sev ler (Black mount). When he returned home he became a well-known scientist.

With the sponsorship of a dynasty of Zakarians princes Gosh constructed Nor Getik Monastery.

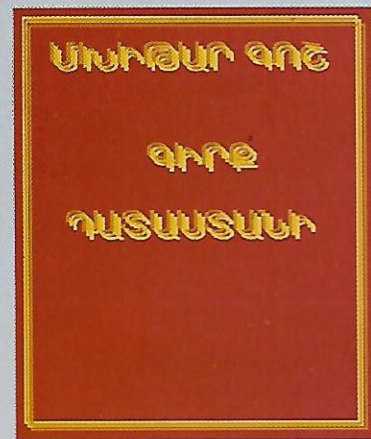

Later this monastery was renamed into Goshavank in his honor. Mkhitar Gosh wrote

comments, religious and historical works. But his greatest scientific work is "Code of Laws" (1184). It is a collection of civil and religious laws and a Code, which is one of the greatest and the most valuable of Armenian Middle Ages. The "Code of laws" was spread and used both in Armenia and in foreign countries, in a number of Armenian communities due to its great advantages and perfection. Armenian community of Sudan uses this code up to now.

It was used also by Georgians and Poles, and it served as the basis for the Code of laws in Russia.

Mkhitar Gosh made a great contribution into the historical development of Armenian culture with his book of fables. He scientifically developed a great number of folk fables.

Mkhitar Gosh wrote 190 fables.

He used fables as instructive and teaching means. His fables teach to be kind, generous, wise, smart, patriotic, to avoid extremes, to get to know own power.

The works of Mkhitar Gosh are highly appreciated by our people.

His greatest merit is his beautiful style: laconic, exact, expressive and colorful.

The last years of his life Mkhitar Gosh spent in the Saint Gevork monastery near Goshavank, where he passed away in 1213.
